Research experience:

My research activities are - as is seen from the list of publications below - mainly related to macroeconomic modelling and applied econometrics. The latter comprises panel data econometrics with micro data as well as dynamic modelling with macroeconomic time series data.

At Norges Bank I was responsible for the Research department through a period when the research activities grew from near zero to 15 man-years. The department achieved good academic standards in fields relevant to a central bank - econometric modelling of the evolving macro economy, studies of financial markets and monetary economics.

The Econometrics of Macroeconomic Modelling (Oxford University Press, 2005) – joint work with Gunnar Bårdsen, Øyvind Eitheim and Ragnar Nymoen – describes the empirical research program and some of the main lessons we have learned from 20 years of macroeconometric modelling at Norges Bank. The book was my idea, responding to a request from professor Clive Granger in 1999.

Since the fall 2005 I have pursued this program at Statistics Norway by doing applied empirical macroeconometric research linked up to the macroeconomic models KVARTS and MODAG. I have also been the project manager for the project “The role of local government in the macro economy”, funded by The Norwegian Association of Local and Regional Authorities (Kommunenes Sentralforbund), 2006 - 2008.

Foreign aid related activities:

March 2017: Fact finding mission to Kenya Institute for Public Policy Research and Analysis (KIPPRA) in Nairobi, Kenya for cooperation between the Macro Working Group (MWG) and Statistics Norway (SN) on development of macro models under the Oil for Development (OfD). A second mission is planned in November 2017.

Teaching experience (since 1990)

Norwegian University of Science and Technology, Trondheim (1990 – 2005):

- Advanced econometrics faculty seminar, which has focused on time series econometrics as well as panel data econometrics.
- Occasional lectures for students on a number of topics: macroeconomics, monetary policy, applied economics and econometrics.

Department of Economics; University of California, San Diego:
Econ 121, Applied Econometrics (Winter Term 2004).

Norges Bank:
Time Series Econometrics (Fall 2004, Winter 2006).

Statistics Norway:
Dynamic Modelling and Cointegration (Spring 2006).

Ph.D. thesis supervision:

Gunnar Bårdsen: "Four essays on econometric specification", Norwegian School of Business and Administration, 1991.

Øyvind Anti Nilsen: "Financing Constraints and Firms' Investment Activities", Norwegian School of Business and Administration, 1998.

Other academic appointments:

- Member of evaluation committee and opponent at the public defense of the dissertations for Bårdsen (1991) and Nilsen (1998), Norwegian School of Business and Administration.
- Chairman for the evaluation committee of the doctoral degree of Kåre Johansen, Norwegian University of Science and Technology, Trondheim (1995).
- Member of evaluation committee and examiner of Sophocles Mavroeidis for the Ph.D.-degree at Nuffield College, University of Oxford. Subject of thesis: "Econometric issues in forward-looking monetary models." (October 2002).
- Member of evaluation committee and opponent at the public defense of the dissertation of Dag Kolsrud at Department of Economics, University of Oslo. Subject of thesis: "Uncertainty in economic models: Comprehensive assessments by stochastic simulations." (December 2002).
- External examiner of Zoë McHugh for the Ph.D.-degree at Queensland University of Technology, Brisbane, Australia. Subject of thesis: "A Small, Macroeconometric Model of the Australian Economy: with an emphasis on modelling wages and prices." (March 2004).
- Member of evaluation committee of Birgit Strikholm for the Ph.D.- degree at Stockholm School of Economics. Subject of Thesis: "Essays on Nonlinear Time Series Modelling and Hypothesis Testing" (December 2004).
- Committee member for assessing applicants for research positions at a number of Norwegian institutions: Statistics Norway, Norwegian School of Business and Administration (professor), Norwegian University of Science and Technology, Trondheim, Norwegian Institute of International Affairs.
- Referee for Research project proposal "Modelling, forecasting and policy in the evolving macroeconomy." (1999), Economic and Social Research Council, UK.

E. Work in progress

E1. “An automatized procedure for jointly forecasting housing prices and credit”. The relative forecasting accuracy of a theory consistent structural vector equilibrium correction model – lifted from Anundsen and Jansen (2013), A15 above – is evaluated against a set of *atheoretical* univariate and multivariate forecasting models.

E2. “Forward looking consumer behaviour? The Norwegian case”
A forward looking formulation of the model in Jansen (2013), A14 above, encompasses various hypotheses based from models based on Euler equations and the tests are performed within the framework of a well-specified cointegrated VAR.
